

# **QCD Equation of State from Holographic method**

*Saturday, 30 November 2024 09:40 (40)*

I will show the results of QCD equation of state under finite temperature, finite baryon density and fast rotation in the framework of dynamical holographic QCD model, and comparing with lattice QCD calculations.

**Presenter(s) :** HUANG, Mei (University of Chinese Academy of Sciences)

**Session Classification :** Day1 Main venue
