

## On symmetry breaking in AdS/CMT duality

*Monday, 2 December 2024 10:50 (40)*

The symmetry breaking plays an essential role in understanding the novel phenomenon in high-temperature superconductivity. We will present a review on various symmetry breaking in the context of AdS/CMT duality, with a focus on providing all the essential ingredients to simulate the phase diagram of the high-temperature superconductivity.

**Presenter(s) :** LING, Yi (The institute of High Energy Physics, CAS)

**Session Classification :** Day3 Main venue
