

# Holography from Conformal Field Theory

*Tuesday, 3 December 2024 16:10 (30)*

In this talk we explain how collective field theory provides a constructive approach to the AdS/CFT correspondence. In particular, we explain how the redundancy present in the collective field theory is directly responsible for the holographic character of the gravitational description.

**Presenter(s) :** KOCH, Robert de Mello (Huzhou University)

**Session Classification :** Day 4: Parallel session III
