

第六届中国格点量子色动力学研讨会

Sunday 11 October 2026

Section 13: 分会场-1, Session 3 - CXII102 (14:30-16:55)

-Conveners: 志成 胡

| time  | [id] title                                                                                            | presenter |
|-------|-------------------------------------------------------------------------------------------------------|-----------|
| 14:30 | [50] Continuous Renormalization Group Beta Function in Four-Flavor QCD                                | Dr 雪莹 韩   |
| 14:50 | [35] Determination of Standard Model Parameters From CLQCD Ensembles                                  | Dr 孟初 蔡   |
| 15:10 | [40] A new approach to the flowed quark field renormalization constant $Z_\chi$ using quark bilinears | Mrs 美琪 高  |
| 15:25 | [57] Gradient-Flow Renormalization of Nonlocal Quasi Operators in Lattice QCD                         | Mr 俊元 黄   |
| 15:40 | [45] Quark-Gluon Vertex under Complete Tensor Basis                                                   | Mr 力军 周   |
| 15:55 | [54] Finite-Volume Gluon Trace-Anomaly Matrix Elements in the $\rho$ -Resonant $\pi\pi$ Channel       | Mr 啸岚 蒙   |
| 16:10 | [59] 基于梯度流的LQCD直接计算：胶子迹反常对重子质量的贡献                                                                     | Mr 晨宇 章   |
| 16:25 | [61] Contributions of Electromagnetic Interaction to Hadron Masses                                    | Mr 奕扬 刘   |
| 16:40 | [60] Bottom baryon mass and sigma term contribution                                                   | Mr 海洋 杜   |
