Neutrino Scattering: Theory, Experiment, Phenomenology (vSTEP 2026)

Saturday 21 November 2026

session 6: Hanlin B331 (15:35-17:10)

-Conveners: Xiao-Dong Ma

time	[id] title	presenter
15:35	[16] Majoron-driven spontaneous leptogenesis in type-II seesaw model	Jin Sun
16:00	[17] Leptogenesis Determined By Low Energy Parameters	Yu-Qi Xiao
16:25	[18] Ultralight dark matter in long-baseline accelerator neutrino oscillations	Hai-Xing Lin
16:40	[19] Discovery potential of charged Higgs at future neutrino telescopes and lepton colliders	Yi-Song Lu
16:55	[34] Boosted Dark Matter Directionality in Large Liquid Scintillator Detectors	Samuel S. H. Tse
